DOMETIC

7 SERIES LITE

LIGHT WEIGHT, COMPACT AND SMOOTH OPERATION

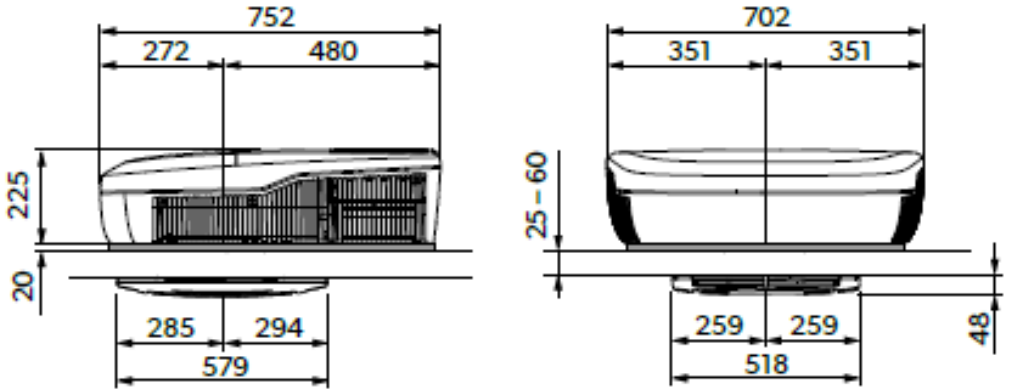

Feature	Benefit
Next generation of Inverter technology	Quietest and smoothest operation (minimum disturbance inside, and ideal for off grid adventures i.e generators, DC batteries)
CleanAir system (air purifier)	Keeps the RV smelling fresh and clean
Light weight and compact design	Ideal for small campers/pop-tops with limited roof space (smallest rooftop in Australia – great for solar panel installations)
Modern design	Give your RV a stylish, modern look
Premium ADB, with full Dometic connectivity	Ambient LED, wifi/BT connectivity with stylish interior look
Patented reversible roof plate	Easy installation (360 x 360 mm or 400 x 400 mm)
R32 refrigerant (low global warming potential)	The most sustainable RV AC in the market
High energy efficiency	Longer run time on batteries and generators

7 SERIES LITE

REPLACING HARRIER LITE IN 2023

		Harrier Lite	7 Series Lite
Cooling	Capacity (W) [ISO5151]	2413	2600
	Power consumption (W)	1648	1550
	Current draw (A)	7.5	6.9
	Airflow (m3/h)	460	426
Heating	Capacity (W) [ISO5151]	2421	2300
	Power consumption (W)	1150	1050
	Current draw (A)	5.2	4.7
	Airflow (m3/h)	462	449
Installed weight (kg)		37	35
Refrigerant		R410	R32
Other features	Air purifier	No	Yes
	Wifi/BT	No	Yes

APPENDIX

INVERTER TECHNOLOGY

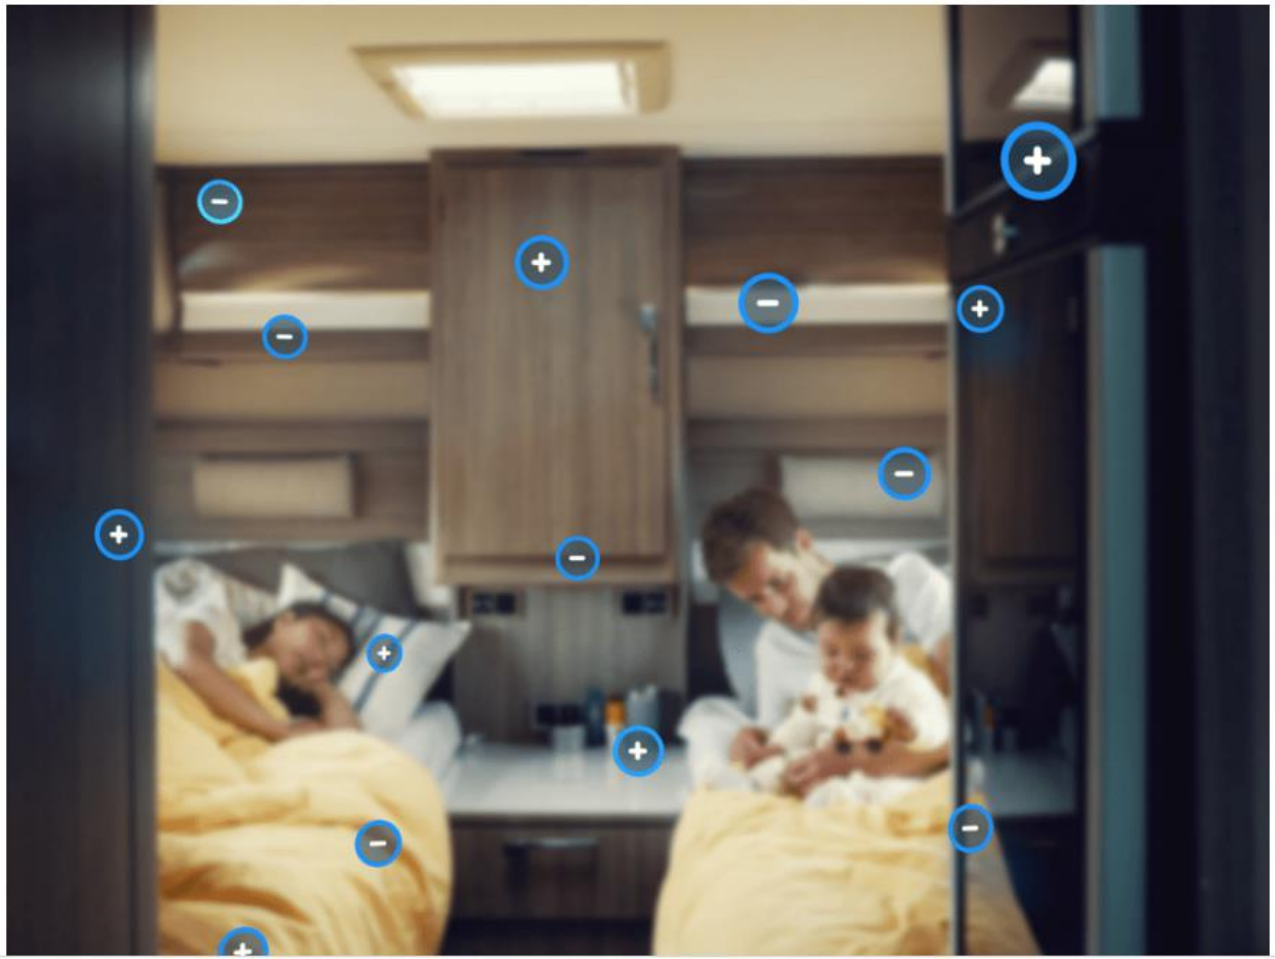

DOMETIC 7 SERIES: 7+ YEARS OF PROVEN TECHNOLOGY

- So far, we have the only Inverter rooftop range in Australia. We have been doing this for 7+ years and with this new range
- We can go even further to make this more relatable..

AIR PURIFICATION

UNMATCHED FEATURES BY ANY OTHER PRODUCTS IN THE MARKET

DOMETIC CLEANAIR AIR PURIFIER

Our new air purification system uses advanced bipolar ionizer technology to keep your RV smelling fresh and clean while greatly reducing allergens, viruses, bacteria and pollutants. Ionizers purify air through several methods. First, they create positive and negative ions to help reduce pathogens, odors, and mold. Bacteria and virus cells are robbed of their life-sustaining hydrogen, reducing their number. Secondly, odors are reduced when they oxidize on contact with the charged ions. Last but not least, the positive and negative ions attach to the particles in the air. Their attractive forces make the particles bigger. This in turn allows the standard dust filter of your air conditioning system to remove more particles from the air.
